

<b>EDUCATION</b>	<b>Carnegie Mellon University, Pittsburgh PA</b>	
	<ul style="list-style-type: none"><li>❖ MSc Robotics (4.00/4.00 GPA)</li><li>❖ Expected Graduation May 2018</li><li>❖ BS Electrical and Computer Engineering, Additional Major in Robotics</li><li>❖ Programming Languages: C, C++, ROS, Simulink, Python, MATLAB, Arduino C, Pascal, System Verilog</li></ul>	Aug 2016- Present Aug 2012- May 2016
<b>WORK EXPERIENCE</b>	<b>Research Assistant</b> <b>Quality of Life Technology Center Personal Robotics Lab</b> <b>Carnegie Mellon University</b>	Oct 2012- Dec 2013
	<ul style="list-style-type: none"><li>❖ Designed custom mounted shields for the 2D scanning Hokuyo lasers using Creo Parametric</li><li>❖ Developed a program using Python and the ROS Python package, for the robot, HERB, to autonomously dock and charge itself</li><li>❖ Calibrated 2D scanning lasers</li></ul>	
	<b>Research Assistant and Systems Engineering Intern</b> <b>Field Robotics Center</b> <b>Carnegie Mellon University</b>	May 2015- Present
	<ul style="list-style-type: none"><li>❖ Working in collaboration with Yamaha to build and design a self-driving all terrain vehicle</li><li>❖ Integrated sensors such as GPS, IMU, Velodyne 64, Multisense with vehicle.</li><li>❖ Built a ROS-CAN driver, using C++, that listened to ROS messages and published them to the CAN network and vice versa</li><li>❖ Conducted system characterization tests to develop the open loop model of the vehicle, then modified and tuned the control architecture of the vehicle, via Simulink to have a better response</li><li>❖ Debugged and tested the system extensively to identify and fix bugs especially with the drive by wire system</li></ul>	
<b>PROJECTS</b>	<b>TrashBot</b>	Jan-May 2016
	<ul style="list-style-type: none"><li>❖ Designed and built a trash sorting robot which classified trash and sorted it into recyclable and non-recyclable bins</li><li>❖ Principal Power Systems Engineer and Embedded Programmer</li></ul>	
	<b>EZ-Kart</b>	Aug 2015 – May 2016
	<ul style="list-style-type: none"><li>❖ Developed and constructed an autonomous cart with the aim of aiding workers in warehouses</li><li>❖ Located the user wearing an April tag using a vision system and maintained a set distance in front of the user as the user moved</li></ul>	
	<b>Learning Terrain Traversability Using SVMs and CNNs</b>	Aug 2016- Dec 2016
	<ul style="list-style-type: none"><li>❖ Created a system to segment an image into traversable, partially traversable and non-traversable regions.</li><li>❖ SVM- libsvm, CNN- custom CNN with inspiration from AlexNet</li></ul>	
	<b>Autolabelling of Outdoor Terrain Images with Roughness Metric</b>	Aug 2016- Dec 2016
	<ul style="list-style-type: none"><li>❖ Programmed a system which fused IMU readings with images.</li></ul>	
<b>RELEVANT COURSES</b>	<ul style="list-style-type: none"><li>❖ Past Courses- Embedded Control Systems, Intro to Robotics, Artificial Intelligence, Humanoid Robotics, Mobile Robot Programming, Robot Kinematic and Dynamics, Systems Engineering, Mechatronics, Computer Vision</li><li>❖ Current Courses- Intro to Machine Learning, Kinematics Dynamics and Controls</li></ul>	
<b>ACTIVITIES</b>	<ul style="list-style-type: none"><li>❖ Formula Society of Automotive Engineers, Director of Safety Systems</li></ul>	Jan 2013- Jul 2014
	<ul style="list-style-type: none"><li>❖ Eta Kappa Nu- Electrical and Computer Engineering Honor Society, VP</li></ul>	May 2015- May 2016
	<ul style="list-style-type: none"><li>❖ Tau Beta Pi- Engineering Honor Society</li></ul>	May 2015
